MECHANICAL MELT PRESSURE GAUGE

M5 SERIES

MAIN FEATURES

- Economically priced
- 1.5 times overload capacity
- Easy-to-read display
- 1/2-20 UNF thread standard, M18 x 1.5 also available
- 15-5 PH stainless steel diaphragm with GTP+ coating standard (others available on request)
- No power required

M50 The rigid stem configuration makes installation fast and easy.

M51 The flexible configuration is designed for applications requiring further thermal isolation or where installation would be otherwise difficult or impractical.

M52 The pressure/temperature configuration requires only one mounting hole for the measurement of both process values.

All models are rugged, totally self-contained, and allow the user to benefit from the improved efficiency and quality that goes with pressure monitoring.

The Gefran melt pressure gauge provides reliable, maintenance-free, localized pressure indication. The small capillary tube filled with a special medium isolates the gauge housing from potential thermal damage.
